

A GOD-GIVEN INOCULATION

(A Quotation From The Message Of The
Hour on the subject of Immunity)

Bro. William Branham

Message: **62-0204 - Communion,**

Para 102-104

102 There was a certain minister said today, I heard him, he said that on a broadcast, he said, that when he come into the country, he had a great sinus trouble, and they were talking of an operation. And they said that they was going to do *this* and *that*, and cut on him and operate, and take part of the sinus glands out, which would sink his face in, and so forth like that. And he said he had taken pills by the barrel. Look like there was so many pills that he had to take. But when he come to a good Christian doctor, the doctor said, "Let's forget the pills and let's

forget the operation, and let's build up the body so it can resist the sinusitis." That's it!

103 What's the matter that people don't live as long as they used to? We have to take a shot for *this* and a shot for *that*, and spraying ourselves over with all kinds of medicine. What does it do? It gets us soft, fat, flabby, no good. When the man of long ago...Why, we're allergic to everything. Now they're getting mal-allergies and everything else.

104 I've stood in Africa, couldn't take a shot for malaria. But a malaria mosquito would light on my hand, I'd have malaria. They don't buzz, and you don't know hardly. They light, they just light on, that's it, you've had it. If you

live, you'll have it for fifteen years. And then sometimes you die with it. And there was those natives in their little huts, with mosquitoes all over their legs, them naked. Mosquitoes sticking on them, malaria mosquitoes, and it didn't bother them. **Why? They had built up an immunity. They had a God-given inoculation.**
